Celtic Solutions Ltd were engaged to provide access equipment in many areas around the bridge for the Box Girder Strengthening project.

Direct contact with Jock the owner/director enabled us to have hands on best service at all times.

His well trained staff are very competent in all aspects of height work, flexible in regards to working hours and have an attitude of "no problems, just get on with the job".

They are proactive in regards to safety, all works are "best practice" and they take pride in each task.

Their equipment is presented in very good condition and is well maintained.

I would not hesitate to recommend Celtic Solutions for any height work.
